PAPIER MACHE AND CARTON PIERRE ENRICHMENTS MANUFACTORY,
49 & 50, RATHBONE-PLACE.

GEORGE JACKSON and SONS beg the attention of Architects, Builders, Decorators, and others, to their large assortment of ENRICHMENTS in every style, executed in the highest class of art—Enrichments for ceilings of every period, elaborate or simple, Gothic, Elizabethan, modernized or flat, Louis XIV. in much variety, and to any degree of cost; Italian and Greek; Renaissance, and many modified characters, executed for the first houses, and from designs of architects of the highest eminence; wall dressings, rich panels of every period, rich Elizabethan and Gothic Dados, in many designs. Door-caps, mouldings, and dressings.

A large assortment of Gothic Bosses to many varied intersections of all sizes, tracery and panel headings for church works, organ dressings, of most periods, and faithfully executed to the traits of each.

The general decorations of Drawing and Dining Rooms, Libraries, &c., of very considerable extent, as furniture, glass frames, tables, windows, cornices, screens, candelabra, and the whole range of accompaniments to Reception Rooms of the first class, as well as more subdued.

The facilities and repeated enlargement of means enable GEORGE JACKSON and SONS to announce the execution of works of the above descriptions in these advantageous materials at a cost considerably below any known method, while for quality, relief, and finish, they flatter themselves they stand unrivalled.

SEWERAGE of LONDON.—The attention of the COMMISSIONERS appointed to determine upon the most efficient material for the Construction of the Sewers of London is particularly directed to the ASPHALTE of SEYSSEL, which, more than any other material, is applicable to the constructing and internal coating of Brick Culverts, and other channels for drainage. The experiments made by the Royal Artillery in the Embrasures of Plymouth Citadel, constructed of Seyssel Asphalted Brick work, under the orders of the Honourable Board of Ordnance, have fully proved the superiority, adhesiveness, and strength of Seyssel Asphalte over all other cementitious compositions. A printed account of these experiments can be had on application to J. PARKELL, Secretary, Seyssel Asphalte Company, "Clardeck's Patent." Established 1838.

Note.—The application of the Asphalte of Seyssel is specially recommended by the Commissioners on the Fine Arts, for covering the ground line of brick work in marshy situations, and it has been ascertained that it would be peculiarly applicable for covering the Areas of closed Graveyards, and for the construction of Catacombs.

GAS EXHIBITION, 1851.—The great and increasing importance of the gas interest, in which so much capital is invested, demands that any improvements or adaptation of the uses to which gas can be applied should be placed before the public in that form in which they are alone calculated to attract attention—that is, in actual operation. This not being permitted at the National Exposition, the Committee of the Gas-Fitters' Association has been induced to make arrangements with the Directors of the Royal Polytechnic Institution for the setting apart of an important portion of that establishment for six months (from May to November), for the EXHIBITION and ILLUSTRATION of APPARATUS embracing any novel or useful application of GAS for culinary, heating, chymical, or manufacturing purposes; improvements in burners, arrangements for lighting, ventilation, governors, and meters, each to be shown in actual operation, illustrated and explained daily by competent persons engaged for that purpose.

The Committee call upon all Gas Companies, metropolitan and provincial, their respective shareholders, as well as coal-owners, gas apparatus manufacturers, and others interested in creating a more extended demand for the gas, to assist them in efficiently carrying forward it as a movement of a successful issue, by contributing towards the necessary expenses, and also giving their aid by causing to be sent the various productions of ingenuity from their respective districts of any apparatus tending to the improved production, distribution, or application of gas; and it is intended to give medals in gold and silver to exhibitors of articles of the greatest public utility.

The Polytechnic Institution will be open to receive apparatus intimable from April 1st to 21st, both inclusive. Subscriptions may be paid to the Account of the Association Exhibition Fund, at the London and Westminster Bank, 1, St. James's-square; or to the Chairman, Mr. George Lethbridge, 23, Gerrard-street, Soho, to whom all communications are to be addressed, and who will furnish any further information that may be required.

The Committee have to acknowledge the receipt of the following donations; and many other metropolitan and provincial companies have stated their intention to subscribe:—
